

Vismo Alert v2.0

The Vismo Alert v2.0 is designed to be clipped onto various materials such as clothing, a belt or bag. The Vismo Alert connects to either the Vismo Locate & Protect App via Bluetooth on a smartphone device.

When the Vismo Alert is pressed, this activates the Red Alert on the App. The alert is ideal for situations where it may not be suitable for a smartphone to be visible.

Features Include:

The Vismo Alert v.20 Bluetooth button connects to the **Vismo Locate & Protect App** and automatically reports accurate location information back to the Vismo Secure Portal. This small and discreet alert button is the ideal solution for high-risk situations or where a smartphone being visible is not appropriate.

When the Vismo Alert is pressed, this activates the Red Alert button on the Vismo Locate Protect App. This discreet alert immediately causes the App to send an SMS and email to managers to inform them of the activation to enable them to provide a quick response.

Virtual Geo-Fences can be added to the map within the **Vismo Secure Portal** to denote high-risk areas or places of safety. Reports and/or alerts will be automatically sent to the necessary teams when employees enter or exit these areas.

Technical Specification

Connectivity	Bluetooth 5.0 LE Long Range
Platforms	iOS and Android
Battery life	Up to 3 years (replaceable)
Line-of-sight range	Up to 200 m
Indoor range	Up to 50 m
Dimensions	30 mm (diameter) 3.8 mm (height)
Weight	8.5 g
Power source	CR2032 Battery

Benefits of the Vismo Alert v2.0:

Manage incidents effectively

Manage incidents effectively through instantly locating workers in the vicinity of the incident area. Bolt-On options for the inclusion of a 24/7 Alarm Receiving Centre are also available if you'd prefer to outsource incident management.

Manage risks and liability

Organisations can manage risks by ensuring workers can be located even in situations where a discreet device is required. In the event of an emergency, the alert can be pressed and this will immediately inform security teams. Ensuring employees feel safe within their roles is vital for wellbeing.

RapidSOS Ready

If you are sharing or receiving emergency data through the emergency response data platform, you are RapidSOS Ready. Be rest assured that life-saving information is getting directly into the hands of 911 and first responders in an emergency.
