

Iridium Extreme 9575

The Iridium Extreme 9575 is designed to locate and protect those who work in remote places where there is often no GSM mobile coverage. The Satellite device sends locations back to the Vismo Secure Portal on a regular basis. This rugged handheld device has many features to protect individuals whilst in remote areas, such as the Panic Alert, Geo-Fencing capabilities and two-way communication.

Features Include:

The Panic Alert feature can be triggered in the event of an emergency. Managers will be instantly informed of the activation and will receive an updated location from the device. The Panic Button is located on the top of the device.

The Iridium Extreme is a Satellite device, a great solution if there is no cellular coverage at the destination. Ensuring employees are always located and protected in the most remote areas.

Virtual Geo-Fences can be added to the map within the Vismo Secure Portal to denote high-risk areas or places of safety to report or alert the necessary teams when travellers enter or exit these areas.

Features	Smallest Iridium device, programmable one-touch SOS button, integrated speakerphone, two-way SMS and short email capability, 21 menu languages

Benefits of Iridium Extreme 9575

Peace of Mind for Employees

Employees gain peace of mind when working in remote areas, often high-risk and inhospitable places where there is no GSM coverage. Employees have the ability to immediately alert security teams of an emergency situation through the Panic Alert feature.

Locate Employees in Remote Areas

Organisations can manage and reduce risks through ensuring employees can be located in the most remote areas. The two-way communication can be used to check on employee wellbeing and safety.

Manage Incidents Effectively

Manage incidents effectively through instantly locating workers in the vicinity of the incident area and communicate effectively through the two-way communication. Bolt-On options for the inclusion of a 24/7 Alarm Receiving Centre are also available if you'd prefer to outsource incident management.
