

Vismo Vehicle Tracker

The Vismo Vehicle Tracker is designed to be easily installed within a matter of seconds into the OBD-II Port. The Vehicle Tracker uses GSM connectivity to automatically send regular location updates to the Vismo Secure Portal, where location history and trails can also be viewed. For ease of use, the Vehicle Tracker can be easily moved between vehicles if required.

Features Include:

Virtual Geo-Fences can be added to the map within the Vismo Secure Portal to denote high-risk areas or places of safety to report or alert the necessary teams when vehicles enter or exit these areas.

The Vehicle Tracker automatically reports accurate location information back to the Vismo Secure Portal once plugged in, ensuring vehicles can be immediately located. The Vehicle Tracker contains an internal battery with up to 2.5 days of reporting without power.

Within the Vismo Secure Portal, organisations can view all of the vehicle locations on the map, along with location history information, which can be exported and history trails.

Technical Specification & Features

Technology	GSM connectivity (2G)
Connection	OBD II Port
Battery	Built-in battery, lasts up to 2.5 days without power
Dimensions	63 x 52 x 28 mm
Power Supply	10 / 32 V DC
Features	Accelerometer, commands and configuration via SMS

Benefits of the Vismo Vehicle Tracker

Manage Risks and Liability

Organisations can manage their risks by having the ability to locate vehicles at all times. Individual Geo-Fence's can be set up in relevant destinations and when a vehicle enters a pre-defined high-risk area for example, the necessary teams will be immediately alerted, enabling organisations to instantly take action.

Easily Installed

No mechanical experience is required for the installation of the devices, they simply plug into the OBD II Port in the vehicle. Ensuring organisations do not incur extra costs for installation. Once the devices are plugged in, they will automatically report to the Vismo Secure Portal.

Manage Incidents Effectively

Manage incidents effectively through instantly locating vehicles in the vicinity of the incident area. Bolt-On options for the inclusion of a 24/7 Alarm Receiving Centre are also available if you'd prefer to outsource incident management.
