

## Vismo Personal Tracker

The Vismo Personal Tracker is designed for those who are working in an environment with mobile coverage and require a discreet device. The Personal Tracker operates on 2G and 3G and once turned on, it regularly sends locations back to the Vismo Secure Portal with no user interaction required. To protect employees, the Personal Tracker features a Panic Alert for use in an emergency situation.

### Features Include:

The Personal Tracker has an integrated Panic Alert on the front of the device. When activated, the Personal Tracker will update a live location and the necessary teams will be notified via SMS and email, along with the audio.

The Personal Tracker reports accurate location information back to the Vismo Secure Portal, ensuring employees can be located and protected when working in various situations where a discreet device may be required.

Virtual Geo-Fences can be added to the map within the Vismo Secure Portal to denote high-risk areas or places of safety to report or alert the necessary teams when travellers enter or exit these areas.

Display	Lights displaying: power, WCDMA, Wi-Fi, GPS
Battery	Up to 10-days
Dimensions	70 x 40 x 25 mm
Features	Thumb-sized panic button, country change alerts, live and historic locations

## Benefits of the Vismo Personal Tracker

### Manage Risks

Organisations can manage their risks by having the ability to locate employees through the Personal Tracker. Individual Geo-Fence's can be set up in relevant destinations and when a user enters a pre-defined high-risk area for example, the necessary teams will be immediately alerted, enabling organisations to instantly take action.

### Peace of Mind for Employees

Employees gain peace of mind knowing they have a small and discreet device available, if an emergency was to occur, the Panic Button can be pressed immediately to inform security teams. This device is ideal for situations where a mobile phone may not be suitable as the device can be placed in a pocket or bag.

### Manage Incidents Effectively

Manage incidents effectively through instantly locating workers in the vicinity of the incident area. Bolt-On options for the inclusion of a 24/7 Alarm Receiving Centre are also available if you'd prefer to outsource incident management.
