

Vismo Alert v2.0

The Vismo Alert v2.0 is designed to be clipped onto various materials such as clothing, a belt or bag. The Vismo Alert connects to either the Global Traveller, Lone Worker or Home Worker App via Bluetooth on a smartphone device. When the Vismo Alert is pressed, this activates the Red Alert on the Vismo App. The alert is ideal for situations where it may not be suitable for a smartphone to be visible.

Features Include:

When the Vismo Alert is pressed, this activates the Red Alert button on the Vismo App. This discreet alert immediately causes the Vismo App to send an SMS and email to managers to inform them of the activation.

As the device is connected to the Vismo App, this automatically reports accurate location information back to the Vismo Secure Portal. This small and discreet alert can be used in high-risk situations or where a smartphone being visible is not appropriate.

Virtual Geo-Fences can be added to the map within the Vismo Secure Portal to denote high-risk areas or places of safety to alert the necessary teams when a user enters or exits these areas.

Technical Specification & Features

Connectivity	Bluetooth 5.0 LE Long Range
Platforms	iOS and Android
Battery life	Up to 3 years (replaceable)
Line-of-sight range	Up to 200m
Indoor range	Up to 50m
Dimensions	30mm (diameter) 3.8mm (height)
Weight	8.5g
Power source	CR2032 Battery

Benefits of the Vismo Alert v2.0

Manage Risks and Liability

Organisations can manage risks by ensuring workers can be located even in situations where a discreet device is required. As the device is connected to a smartphone device via Bluetooth, organisations can use features such as Geo-Fencing and Incident Management to ensure users are safe.

Peace of Mind

Employees gain peace of mind knowing they can wear a small and discreet device. In the event of an emergency, the alert can be pressed and this will immediately inform security teams. Ensuring employees feel safe within their roles is vital for wellbeing.

Manage Incidents Effectively

Manage incidents effectively through instantly locating workers in the vicinity of the incident area. Bolt-On options for the inclusion of a 24/7 Alarm Receiving Centre are also available if you'd prefer to outsource incident management.
