

RockSTAR Device

The RockSTAR uses the Iridium Satellite network to transmit locations and messages through the the Vismo Secure Portal. The RockSTAR is a lightweight, rugged handheld device, designed to support those who may not have GSM mobile coverage available. There are many features to help protect employees whilst in remote areas such as the Alert button, two-way messaging and Geo-Fencing.

Features Include:

The Panic Alert feature can be triggered in the event of an emergency. Managers will be instantly informed of the activation and will receive an updated location from the device.

The RockSTAR device has two-way messaging capabilities, to ensure employees stay connected. Users can send SMS, emails and use social media accounts.

Virtual Geo-Fences can be added to the map within the Vismo Secure Portal to denote high-risk areas or places of safety to report or alert the necessary teams when employees enter or exit these areas.

Technical Specification & Features

Technology	GPS-based tracking and SMS location sharing
Display	Single Colour OLED 26 x 35mm
Dimensions	144 x 76 x 36 mm (plus antenna)
Battery	Up to 3 weeks on 15 minute fixes
Weight	305 g
GPS Receiver Type	50 channel
Testing	MIL-STD 810G for vibration, temperature and shock IP67 - sealed against dust and water ingress to immersion of 1m
Features	Accurate location tracking, two-way communication, alert button, encryption, multi-language support

Benefits of the RockSTAR

Peace of Mind for Employees

Employees gain peace of mind when working in remote areas, often high-risk and inhospitable places where there is no GSM coverage, knowing the RockSTAR has location and protection features.

Improve Employee Wellbeing

The two-way communication can be used to check on employee wellbeing and safety. Employees have the ability to immediately alert security teams of an emergency situation through the Panic Alert feature.

Manage Incidents Effectively

Manage incidents effectively through instantly locating workers in the vicinity of the incident area and communicate effectively through the two-way communication. Bolt-On options for the inclusion of a 24/7 Alarm Receiving Centre are also available if you'd prefer to outsource incident management.
