

Vismo Remote Worker App

The Vismo Remote Worker App is fit for purpose for those working remotely or within a home environment. Organizations need to ensure the risks of working remotely are managed and reduced, to keep employees safe. The App has many features to improve employee wellbeing and peace of mind, such as Incident Management, Mass Notification, Wellbeing Checks and the Privacy Mode. The App is fully customizable for organizations to add their own branding, colours, web links and phone numbers. Please note, Remote Worker is also referred to as Home Worker.

Features Include:

The Incident Management feature provides managers with the ability to immediately identify if any employees are within the vicinity of an incident.

Working remotely can be isolating at times, therefore it is essential for organisations to check on their employees wellbeing. The wellbeing feature enables employers to understand when their employees require some additional support.

To protect privacy without comprising safety, the Privacy Mode feature enables individuals to choose when their device is located, to safeguard privacy whilst using the Vismo App.

* These features require a minimum Licence quantity of 250.

** Local: County or State.

Benefits of The Remote Worker App

Peace of Mind for Employees

Employees gain peace of mind knowing if an emergency situation happens, the Red Alert feature is available to immediately raise an alert and inform managers. The Incident Management and Mass Notification feature ensures employees can be provided with essential information when required.

Effectively Manage Risks

Points of Interest Layers can be incorporated into the Vismo Secure Portal, enabling organizations to view locations and risks in relation to employees. This can include risks such as COVID-19 case rate data and incident impact areas, providing organizations with the tools to better manage an incident.

Provide Immediate Support in an Alert Situation

If an incident occurs, the Mass Notification enables managers to instantly inform employees with critical information and instruction if necessary. By implementing measures early, organizations can be proactive in their management of incidents.
