

Garmin GPSMAP® 66i

The Garmin GPSMAP® 66i is designed for those working in remote conditions where there is often no GSM mobile coverage. This rugged handheld device works on the Iridium Satellite network and sends regular locations back to the Vismo Secure Portal. To protect employees in remote areas, there is a Red Alert feature, Incident Management, Geo-Fencing capabilities and two-way communication.

Features Include:

The Garmin GPSMAP® 66i is a Satellite device, a great solution if there is no cellular coverage at the destination. Ensuring employees are always located and protected in the most remote areas.

The Red Alert Button is located on the side of the device, this can be triggered in the event of an emergency. Managers will be instantly informed of the activation and will receive an updated location from the device.

Virtual Geo-Fences can be added to the map within the Vismo Secure Portal to denote high-risk areas or places of safety to report or alert the necessary teams when travellers enter or exit these areas.

| Preloaded Maps | Yes |
| Memory | 16GB |
| Battery | Rechargeable lithium-ion, Up to 35 hours at 10-minute tracking |
| Features | GPS, Barometric Altimeter, Compass, GPS Compass (while moving) |

Benefits of the Garmin GPSMAP® 66i

Locate Employees in Remote Areas

Organisations can manage and reduce risks through ensuring employees can be located in the most remote areas. The two-way communication can be used to check on employee wellbeing and safety.

Manage Incidents Effectively

Manage incidents effectively through instantly locating workers in the vicinity of the incident area and communicate effectively through the two-way communication. Bolt-On options for the inclusion of a 24/7 Alarm Receiving Centre are also available if you'd prefer to outsource incident management.

Peace of Mind

Employees gain peace of mind when working in remote conditions, often high-risk and inhospitable places where there is no GSM coverage. In the event of an emergency, employees have the ability to immediately alert security teams with the Panic Alert feature.
